Presidents and Monarchs.

Some people think it is a great thing to be a king. They think that there is a halo of glory about royalty. As a matter of mere honor, we would rather be President of the United States than the greatest monarch that ever trod the earth. Take the Emperor of Russia, or the Queen of England. What are they? The mere creatures of circumstances. They were born to sit on their respective thrones, and To the President of the Cape Fear and without a civil war they could be nothing else but the sovereign rulers of their respective nations. It is probable that those interested in the Central Railroad line from Richmond to this point know that nobody would take this route if they could get on by any other, and treat passengers accordingly. The omnibusses at Richmond were crowded, and one broke down.
